99.508%

COMPOUND	GHK-Cu
NOMINAL DOSE	100 mg
VIAL DOSE (VERIFIED)	95.02 mg
ANALYTICAL METHOD	HPLC-UV 214 nm
PEPTIQ LOT N°	PQ-JNS-94645-GHK
TEST DATE	18 Dec 2025
STORAGE	-20 °C · protected from light

About this analysis

This vial was sampled from PEPTIQ production lot **PQ-JNS-94645-GHK** and shipped to **Janoshik Analytical s.r.o.** (Brno, Czech Republic) for independent purity determination. Janoshik operates under **ISO/IEC 17025:2017**, the international standard for testing laboratories, and is widely regarded as the reference third-party verifier for therapeutic-grade peptides.

Purity was measured by **HPLC-UV at 214 nm** — the peptide-bond detection wavelength. The reported value is the target peak area divided by the total chromatogram area. Remaining material consists of process-related minor impurities, individually below research-material thresholds.

How to verify this certificate

01

PUBLIC VERIFIER

Enter your PEPTIQ Lot N° at peptiqmx.com/verify. Returns the matching record in real time.

02

VIAL QR SCAN

Each vial ships with a QR linking directly to its lot record — no typing required.

03

RAW LAB FILE (B2B)

Qualified partners may request the raw Janoshik chromatogram under NDA at hola@peptiqmx.com.
